ROAD RESEALING PROJECT TO BEGIN

TUESDAY, MAY 11

Work is about to begin on resealing the pavement in the entire community. During this project, residents will unfortunately experience some parking and traffic disruptions. As the work cannot be completed all at once, the community will be divided into different phases of work zones, which will be cautioned off from traffic and parking prior to commencement of work in that area.

Residents are urged to avoid parking in work areas. Any vehicles that remain in a scheduled work area will have to be towed to keep the project on schedule.

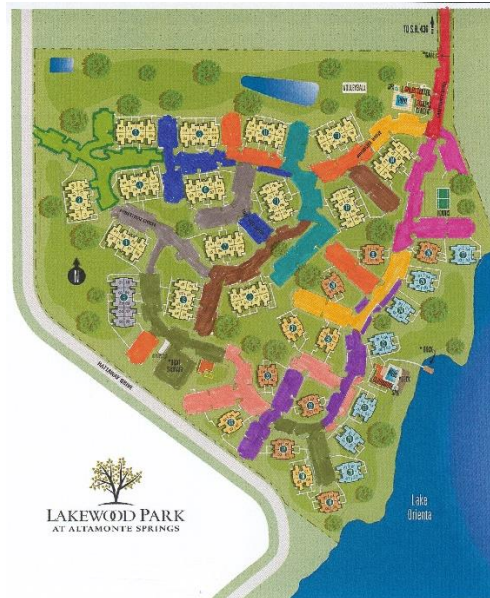

Each area will take approximately two days to complete the resealing, restriping and drying process. Please note that if any area is delayed it will be moved to the following day excluding weekends.

HERE IS THE TENTATIVE SCHEDULE OF WORK AREAS*

All residents are urged to drive slowly and cautiously through the community during this project due to the numerous work areas, traffic and parking disruptions and traffic flow issues.

ADDITIONAL INFORMATION

All residents are urged to make sure their vehicle is registered with the Association Office and visitor's vehicles have **VISITOR TAGS**. This is to help us identify the owner and contact them if the need arises.

Make sure the Association Office has your email to receive updates about the project. Send it to:

ASSOCIATION OFFICE CLOSED

The Association Office will be closed on the following days:

Thursday, May 27
Friday, May 28
Monday, May 31

THE ONS AND OFFS OF SUNSCREEN

The warmer weather is approaching, and more and more residents will be using our community pools and sundeck areas. While it seems suntan oil and pools go hand in hand, oil and water do not mix when it comes to pool maintenance. Most lotions are oil based, making it difficult to process through the pool's filtration system. Our natural body oils and sweat also contribute to the problem.

PLEASE MAKE SURE TO SHOWER BEFORE ENTERING POOLS AND/OR SPAS.

WAIT 15 MINUTES AFTER APPLYING LOTIONS BEFORE ENTERING POOL
